-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Fiterman et al. (US#5137212).

3. Regarding claim 1, Fiterman discloses a secure receptacle 10 for inserting articles therein, said receptacle comprising an open end 22 closed with a pivoting member 32 having two extending leg elements 34,36 joined at a pivoting point, wherein a first leg 34 is positioned and adapted to completely cover the opening without entering into the receptacle and without substantive formation of a space between said first leg and the inner wall of the receptacle, and wherein the other leg 36 is positioned and adapted to pivotally move within the receptacle adjacent the open end thereof to a position not beyond the open end, whereby said other leg comprises means for preventing access the interior of the receptacle (rear angled portion of other leg 36 for contacting element 56) when the first leg is removed from covering the receptacle, whereby no external access is afforded to the interior of the receptacle at any time, with pivoted removal of the first leg from covering the opening (see Fig. 4), whereby the receptacle comprises means permit entry of an article into said interior of the receptacle only with closure of said opening by said first leg (broken line, Fig. 4).

Art Unit: 3677

4. Regarding claim 2, the other leg is in constant contact with a portion of said receptacle (rear angled portion of other leg 36 in contact with element 56) to provide said prevention of external access but is removed from said portion with covering of the opening by said first leg (broken line, Fig. 4).

5. Regarding claim 3, the receptacle comprises means to cause the article to fall into the interior of the receptacle when the opening is covered by said first leg, namely the v-shape of the pivoting member and gravity.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
